

Battery Backup System

- Four slots for hot-swappable, high performance Li-ion BBUs
- Provides up to 7kW system backup power
- Over 3 minutes run time at full load
- Monitors battery condition
- Active current sharing technology to optimize battery life
- 21-inch Battery Backup System with only 10U height
- PMBus 1.2 communication support

Battery Backup Unit

- 1.75kW power output (91.6A maximum) for system backup
- Off-Line and On-Line models
- Modular high performance Li-ion battery pack inside (replaceable)
- Monitors battery condition
- 1 OU height
- Hot-swappable
- Active current sharing technology to optimize battery life
- PMBus 1.2 communication support
