

Renowned OpenStack expertise for your complete peace of mind

Whether you are looking to upgrade to the latest OpenStack release, implement a new OpenStack project, or looking for guidance in your OpenStack strategy - you can count on us to help you reduce both time and risk.

Diverse OpenStack Solutions and Managed Services

OpenStack Consulting

VEXXHOST truly knows OpenStack. We can assist you with any of your infrastructure needs such as architecting, strategizing, designing, implementing new projects, and health checks. You name it, we can help you with it.

Kubernetes Enablement

Make the most of your OpenStack environment by offering your users the ability to experience Kubernetes. Leverage VEXXHOST's years of operational experience to quickly and safely integrate OpenStack Magnum, Barbican, and Octavia into your existing cloud.

OpenStack Upgrades

Is your infrastructure running on an old, or even an end of life, OpenStack release? Focus on your core competencies while VEXXHOST upgrades your environment to the latest releases while minimizing downtime and optimizing your infrastructure.

Managed Zuul

Let us do the heavy lifting! With us, you can consume OpenStack's CI tool, Zuul, as a hosted and fully managed service without having to worry about configurations, management, upgrades, or the infrastructure layer underneath.
