

VanillaStack

#CloudExcellence #VanillaStack

Current challenges in IT

Customers and Stakeholders expect more:

- Greater Flexibility in Infrastructure
- Faster Deployments
- Faster Reactions
- Better Scalability
- 24/7 Availability
- Automation
- Governance
- Lower Costs :-)

Let's do Cloud!

Kubernetes

- ✓ Container-Orchestrator
- ✓ Self-Healing Services
- ✓ Automatic Load Management

- √ Secury by Design
- ✓ 100% Open-Source
 - √ Huge Community

76%

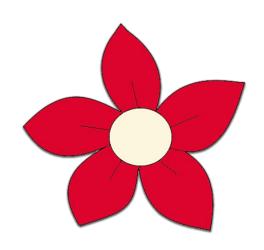

of all organizations plan to go cloud-native in the next three years...

Challenges with Kubernetes

But, Kubernetes is very challenging:

- Steep learning curve
- Huge integrational efforts
- Applications need to be rewritten
- Infrastructure- and Deployment-automation required
- Containers only what about VMs?
- Default installation not production ready
- Commercially often Vendor Locked

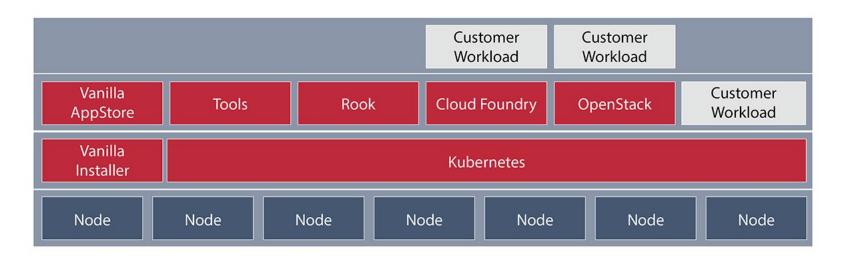

VanillaStack

✓ Enterprise Open-Source Cloud-Stack

√ Bring your own Linux

√ Kubernetes as Operating System

√ Full Commercial Support

True Open-Source

- ✓ 100% Open-Source Projects
- ✓ Vanilla-Editions of Projects
- ✓ Support for the Community
- ✓ No Vendor-Lock!
- Always with Rook-Object Storage!

Complete Stack

Vanilla Installer | Vanilla AppStore Management Keycloak | Flaco | Aqua | Clair Security Prometheus | Grafana | Elasticsearch | Fluentd | Kibana | Jaeger Monitoring Cloud Foundry | Gitlab CI | Jenkins | Harbor **Workload Automation** OpenStack | KubeVirt | Ansible | Terraform Infrastructure Automation Rook | Ceph | NetApp Trident | Velero Storage / Backup Docker | CRI-O | ISTIO Container Runtimes / Service Mesh Kubernetes OS / Container Orchestration

Runs on (nearly) any Linux!

✓ Any modern Linux with Container-Support:

- √ Fedora 32 / CentOS 8 / RHEL 8
- ✓ OpenSUSE Leap 15.2 / SLES 15.2
- ✓ Debian 10 / Ubuntu 20.04 LTS

Because Simplicity is Best

- ✓ Components to be rolled out automatically
- ✓ Initial installation via VanillaInstaller
- ✓ Installations and updates via VanillaStore
- ✓ Out-of-the-Box-Integrations and operability
- ✓ Simple Roll-Back of Installations
- ✓ Commercial Support for the complete platform

From Platform to Ecosystem

- ✓ Vanilla Installer and VanillaStore
- ✓ Out-of-the-Box-Integrations and Functionalities
- ✓ Can be expanded with a huge amount Open-Source- and Commercial-Components
- ✓ Always open, no Vendor-Lock!

VanillaStack runs everywhere!

Use-Cases

OpenStack on VanillaStack

✓ OpenStack HELM

✓ Rook or Ceph as Storage

✓ Installation via AppStore

✓ Roll-Out and Operations in <40min!</p>

✓ Recommended Configuration:

√ 3 Master-Nodes for HA

√ 5 Worker-Nodes for Workloads

✓ 20+ Cores for OpenStack Worker

√ 64+GB RAM for OpenStack Worker

VanillaStack for ISVs

Kubernetes as Base

√ Harbor for Images

✓ Rook as Storage

✓ ISTIO as Service Mesh

✓ GitLab, Jenkins or Cloud Foundry

- ✓ Recommended Configuration:
 - 3 Master-Nodes for HA
 - 3 Worker-Nodes for Workloads
 - 20+ GB Storage

VanillaStack for Ops-Teams

✓ Prometheus

✓ Grafana

✓ ELK

Rook or Ceph as Storage

✓ Rolled Out and directly usable

- ✓ Recommended Configuration:
 - 3 Master-Nodes for HA
 - 5 Worker-Nodes for Workloads
 - 40+ GB Storage

Subscriptions and Support

Subscriptions and Support

Trust and Security for Open-Source Projects

VanillaStack Flat

- √ Fixed Fee per Node
 - ✓ No additional costs for CPUs, RAM, etc.
 - ✓ Simple Calculation of Nodes to be licensed via VanillaStore or kubect1 get nodes
- ✓ Subscription Intervals:
 - ✓ Annually
 - √ 2 years

- ✓ Payment Intervals:
 - ✓ Monthly
 - ✓ Quarterly
 - √ Every 6 months
 - ✓ According to subscription interval
- √ Always with Commercial Support
 - ✓ Up to 24/7 SLAs available

VanillaStack Flat: Commercial Support

✓ Flatrate:

- ✓ Always all Products delivered with VanillaStack!
