# Get Up to Speed, or Fall Behind

Mirantis is an established leader in technical training for open cloud technologies. We are a leading vendor in that space with our Docker, Kubernetes, and Openstack training portfolio. Since 2012 we have successfully trained and certified over 40,000 cloud professionals, who choose Mirantis for our expert instructors, proven hands-on curriculum, real world focus, and preparation for industry recognized cloud certification exams.

Why Choose Mirantis Training

Technology Domain Expertise

Our technology domain expertise includes:

- **Cloud Native Computing** - Docker Containers and Kubernetes deliver order-of-magnitude improvements in delivery speed and cost savings while securing the entire software supply chain for applications made for the cloud.

- **OpenStack** - OpenStack is the preeminent platform for bootstrapping public, private and hybrid clouds to power software-driven businesses in all sectors. Our OpenStack track is fully vendor-agnostic and helps master this modular and expansive open-source platform.

- **Mirantis Cloud Platform (MCP)** - Mirantis Cloud Platform offers a seamless platform integration between OpenStack, Kubernetes and more. Our training helps students master operation and deployment of the most powerful and comprehensive cloud platform on the market with our official MCP enablement.

Training Delivery and Instruction

Whether you need a half a dozen private classes for your team, a single seat in a public class, prefer a self-paced on-demand format, or need a combination of all the above, we are here to offer a **custom training solution** catered for your team's education needs.

- For Mirantis **direct private delivery** we engage our technical instructors, who leverage a unique combination of real-world technical experience with advanced communication and teaching skills. Mirantis instructors have a direct and active relationship with our curriculum development team, contributing directly to the development process of our courses, as well as staying connected to the Mirantis product engineering, professional services, and support teams.

  We deliver private training in Classroom and Live Online formats, available worldwide. Currently all of our private classes are delivered in English.

- Mirantis **public classes** are available around the world, online and in-person providing options convenient for you. Public classes are always delivered by our exclusive network of Mirantis Authorized Training Partners to ensure a consistent quality experience for each student.

- **OnDemand training** is available for select courses from the Cloud Native curriculum and offer the same benefits, training content, and hands-on labs found in our category leading instructor-led classes, while offering ultimate flexibility for our students with a self-paced online format.

Cloud Certification

Mirantis Training is designed to help students gain the practical skills and hands-on learning they need to be successful using these technologies in the real world. They also serve as the foundation of your path to successfully prepare for the certifications we offer. Validate your skills to the world and get recognized for what you know with our industry leading certifications for Docker, Kubernetes, and OpenStack: Docker Certified Associate (DCA), Certified Kubernetes Administrator (CKA), and Certified OpenStack Administrator (COA).

- **Docker Certified Associate (DCA)**
  The DCA exam serves as a foundational benchmark for real world Docker skills across the container industry. The exam is owned, designed, and administered by Mirantis Training.

- **Certified Kubernetes Administrator (CKA)**
  The CKA is the industry standard Kubernetes exam offered by the Cloud Native Computing Foundation. Mirantis Training is the official partner & reseller for the CKA exam, all proctoring and scheduling is done by the CNCF.

- **Certified OpenStack Administrator (COA)**
  The COA is the industry standard OpenStack exam offered by the OpenStack Foundation. This is a performance-based exam testing the skills required to provide day-to-day operation and management of an OpenStack cloud. Mirantis Training is the official OpenStack Foundation partner responsible for the exam design and administration.

Training Subscription

The Mirantis Training Subscription is the most flexible way to purchase Mirantis training for your team. It allows you to conveniently purchase a bank of Training Credits that can be redeemed throughout the year for any Mirantis training or certification offering as your enablement needs arise.

- Complete Flexibility
  - » One purchase, 365 days of benefits
  - » Easy redemption and tracking
  - » Access to the whole Mirantis training and certification catalog

- Efficient Scheduling
  - » Redeemable for private classes, seats in select public classes, on demand courses, and certification exams
  - » On-site or live online deliveries supported
  - » No ad hoc purchases or additional paperwork

- Unlocked Savings
  - » Lock-in savings upfront and take advantage all year
  - » Eliminate instructor travel and class customization fees

We offer a choice of 4 subscription levels to match your organization's specific requirements. Each level includes a set number of Training Credits (TC) as well as exclusive subscriber-only benefits depending on your subscription level.

Learning Tracks

We offer real world, hands-on learning experiences for all skill levels.

Cloud Native Computing Learning Track

Kubernetes Operations

Bundle up and save:
CN251: Cloud Native Operations Bootcamp (5 Days)

CN100: Docker Containerization Essentials (1 Day) → CN120: Kubernetes Application Essentials (2 Days) → CN220: Kubernetes Operations (2 Days) → CN320: Advanced Kubernetes Operations (2 Days) → CKA: Certified Kubernetes Administrator Exam

Kubernetes Development

Bundle up and save:
CN252: Cloud Native Development Bootcamp (5 Days)

CN100: Docker Containerization Essentials (1 Day) → CN120: Kubernetes Application Essentials (2 Days) → CN230: Kubernetes Native Application Development (2 Days)

Docker Enterprise Operations

Bundle up and save:
CN251: Cloud Native Operations Bootcamp (5 Days)

CN100: Docker Containerization Essentials (1 Day) → CN110: Kubernetes Application Essentials (2 Days) → CN210: Docker Enterprise Operations (3 Days) → CN310: Advanced Docker Enterprise Troubleshooting (2 Days) → DCA: Docker Certified Associate Examv

CN120: Kubernetes Application Essentials (2 Days)

OpenStack Learning Track

OpenStack

Bundle up and save:
OS250: OpenStack Administration Bootcamp (4 Days)

OS100: OpenStack Essentials (1 Day) → OS220: OpenStack Administration & Operations (3 Days) → COA: Certified OpenStack Administrator Exam → OS320: Advanced OpenStack Deployment (1 Day)

Mirantis Cloud Platform (MCP) Learning Track

Mirantis Cloud Platform (MCP)

MCPOps: MCP Operations (2 Days) → MCP100: MCP Deployment (3 Days)

Bundle up and save:
MCP250: Advanced MCP Deployment & Operations Bootcamp (4 Days)
